

Trilogy Swing 2022 Health Safety Policy

Trilogy Swing is committed to protecting the health and safety of every community member through implementation of reasonable best health practices as well as through adherence to state and local health requirements.

HEALTH POLICY

For 2022, Trilogy Swing **will not require people to be vaccinated** with the COVID-19 vaccine.

However, entry into the event **will require ALL attendees to provide a Negative COVID-19 test** that complies with one of the following four (4) methods:

1. A verifiable PCR or NAAT test, showing a negative result from a test that was performed **no more than 60 hours prior to your arrival** at the event at the event Registration/Check-In desk. For this type of test:
 - You must receive a valid results document from your test provider that includes:
 - Provider name
 - Your name
 - The date/time the test was taken
 - Type of test
 - Negative result
 - Documentation can be in the form of a printed document, email, telehealth app notification or provider portal.
2. The completion of a “proctored/supervised” self-administered antigen test completed **no more than 24 hours prior to arrival** at the event Registration/Check-In desk. This type of test must be one approved for use by cruise lines, airlines and other international travel situations. For this type of test:
 - The test must be supervised by a health professional; such as a doctor, pharmacy technician, public health worker or telehealth representative
 - You must receive a valid results document from your test provider that includes:
 - Provider name
 - Your name
 - The date/time the test was taken
 - Type of test
 - Negative result
 - Documentation can be in the form of a printed document, email, telehealth app notification or provider portal
3. A self-administered same-day rapid test resulting in a negative result. For this option, the following steps must be followed: (**Note: Your photo ID must be included in each photo**)
 - Initial the outside front of the test jacket/card and take a time-stamped picture of the jacket/card prior to starting the test.
 - Upon swabbing yourself, insert the swab into the jacket/card and take a 2nd time-stamped photo.
 - After the required wait/processing time, take a 3rd time-stamped photo showing the negative result.
 - Bring both the three (3) time-stamped photos as well as the physical test with you. We will discard the test at the event upon verifying the negative result and that the procedures were followed.
4. A rapid test taken upon arrival at the event, overseen by our Registration Staff.

If you test positive during the check-in process, you will have the opportunity to take a 2nd test to determine if the 1st test might have produced a “false-positive”. For any attendee that does, in fact, test positive and cannot enter the event, we will refund the cost of your pass.

Attendees are required to bring their own tests; however, a very limited number of tests will be available for purchase at the door. Please do not depend on the event for rapid tests.

Masks: Our Mask Policy will be released closer to the Event Weekend.

Safety Protocols: Hand sanitizer will be available throughout the event space as well as the hotel common areas, and frequent hand washing is highly encouraged.

Finally, if you are not feeling well or begin to experience signs of illness while at the event:

1. Contact a member of the Event Management Team ASAP. We will work with you to get you and your roommates, travel companions and others you have been in close contact with rapid tested quickly in efforts to minimize any potential spread.
2. Self-Isolate in your hotel room and avoid communal spaces!
3. If you are found to be positive, we will work with you to carry your pass forward to a future event or process an appropriate credit up to a full refund of your pass.

Note: We will continue to monitor things as we get closer to the event weekend, and will let everyone know if anything changes in response to the ever-changing situation and if we update our policy and guidelines. In addition, if any applicable mandates and/or recommendations are issued or lifted by local, state or government agencies, we will review and modify this policy to ensure our compliance.
